GUY PAUL THOMPSON

**Associate Professor
of Anatomy**

HEALTH SCIENCES LIBRARY
UNIVERSITY OF MARYLAND
BALTIMORE

As we look back on our four years of dental training, we have many fond memories. One of these is our association with Professor Thompson. We shall remember particularly his gentle and courteous manner, his informal but effective way of conveying his vast resources of knowledge, and his sincerity and devotion to teaching.

The Class of 1961 is indebted to you, Professor Thompson. We acknowledge our appreciation by dedicating our yearbook to you.

In Memoriam

KEITH G. LOWN

We, the Class of 1961, will long remember our classmate and friend Keith G. Lown whose tragic death in February, 1960, brought sorrow and grief to us all.

A native of California Keith entered the Baltimore College of Dental Surgery after receiving his B.A. from Fresno State College. During his three years at the Baltimore College of Dental Surgery we all grew to know and respect him for his dedicated devotion to his dental studies. His desire was to reach and maintain the highest professional and ethical standards possible. But perhaps Keith's most outstanding characteristic was exemplified by the number of friends he had who will always cherish his memory. His classmates elected him as one of their class officers and he was an active member of Xi Psi Phi fraternity.

His was a philosophy that can best be explained by the following excerpt from a letter written by Keith shortly before his death:

"What do I really want? I really do not know what I want, but this I do know, I want to be outstanding. I want to be a credit to my wife, my family, my friends. I want to be liked, I want to be known, I want to be remembered."

The student body and faculty mourn the passing of a friend.

FAREWELL, MISS TOOMEY

After 44 years of devoted service to the B. C. D. S. Miss Toomey has retired. Miss Toomey began working at the dental school as a secretary in 1917. She became Administrative Assistant in the 1920's and has the distinction of having served under three deans: Dr. Timothy O. Heatwole, Dr. J. Ben Robinson, and the present dean, Dr. Myron S. Aisenberg.

Of her many activities, Miss Toomey has served as secretary of the Dean's Council, and secretary-treasurer of the Faculty Assembly. She has been active in the Newman Club, the Dental Assistants Society and was an organizer of the Women of Psi Omega. She is an honorary member of the School's Alumni Association, the Alumni Association of the University of Maryland and the Ladies Auxiliary of the Baltimore County Dental Society. Miss Toomey has the distinction of having received an honorary LL.D. degree from Mount Saint Mary's College in 1958. In 1960 the Student Senate presented her with a plaque commemorating her outstanding service and assistance to the student body.

Since 1917, Miss Toomey has been like a mother-away-from-home to many of the 3,371 graduating students. She has added the invaluable feminine touch to the School and has helped to make her boys feel at home.

The Class of 1961 bids you farewell, Miss Toomey. We wish you the best of luck in the future and may God bless you.

"THERE MAY BE TIMES
WHEN YOU BOYS WON'T
AGREE, BUT THESE NEXT
FOUR YEARS ARE GOING TO
BE THE HAPPIEST OF YOUR
LIVES." *

DONALD A. BROWN

FRANK J. SINNREICH, JR.

How long is four years? As entering freshmen, four years seemed, to us, an undefinable amount of time to be spent working together and alone, working toward that day which is now upon us. Graduation is traditionally thought of as the end of one phase of learning and the beginning of another. But it is more. It is a time of remembering and of evaluating that which now belongs to the past.

Four years ago we began our studies at B. C. D. S., each bringing with him ideas, previous training, and various backgrounds. We represented almost as many areas as there were individuals. Some of us had traveled widely; others found themselves away from their home states for the first time. The majority of us came directly from undergraduate schools, but some had worked or served in the Armed Forces before beginning their professional training. Our strongest bond was a common desire to become a dentist.

Four years of working, wishing, laughing, learning, and even complaining together have served to broaden and strengthen the original bond we shared. Together we have paved the way for classes that will follow ours. We have broken in (and broken down) new professors and helped institute and execute revisions. Socially, as well as scholastically, we have formed common bonds through school and fraternity dances as well as through extracurricular activities.

The termination of these four years again finds us dispersing to different areas, seeking individual goals. Some of us will continue our professional education; others will enter the Armed Services; still others will teach or begin private practice. However, we part with the knowledge that our first common bond will remain with us—we're all dentists.

**honorary president
of the
class of 1961**

Jose H. Diaz

During our clinical years, we had the opportunity to become well acquainted with Dr. Diaz. As we got to know him better we realized that this was a dedicated teacher, who showed interest and respect for the individual student. This was a teacher who not only generated interest in the acquisition of knowledge, but made our training pleasurable.

We admire him for his professional character: his politeness, sincerity, patience and humility.

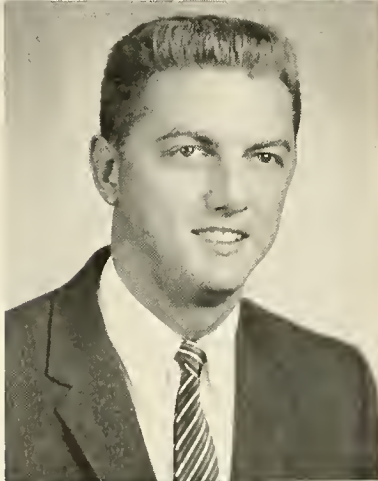

Dr. Diaz, the Class of 1961 unanimously elected you its honorary president.

"Oh, to be a Junior!" This was an often heard lamentation in the sophomore labs as we carved the third wax pattern due to an unexplainable mis-cast, or fished our anterior pontics out of the drain. We were to have a great awakening when we received our first patient from Diagnosis and saw just how confusing the conglomeration of charts, X-rays, order blanks, initials, rubber dams, and thirty-two teeth could be. When the anxiously awaited day to sink our first bur finally arrived, we discovered how hard a tooth really is, and that a white gown didn't make us dentists. Root canals could get infected and the ideal cavity preparations were more easily "vishualized" than realized. One after another the surprises came. The thermometer and the class "barometer" both soared to heights that had not been equaled in the previous two years. Frequently the plaints could be heard—"I need a gold foil." "Who has an extra pedo patient?" Each of us felt that no other student could possibly have experienced as desperate a situation with patient shortage and the inevitable cancellations.

Colts games, fraternity parties, and class dances made the week ends something to be anticipated on Fridays and, in some instances, not to be remembered pleasantly on Monday. Never a dull moment as we continued up the slopes of Mount Olympus. The phrase which might well have served as a motto for the Class of '62 in its first clinical year was "Hurry up to wait!"

Scholastically the class had an unusually high percentage of men entering the Gorgas Odontological Society, and the entire class is to be congratulated on one hundred percent satisfactory results on the National Board Examinations.

Though the tests of one's ability, patience, and fortitude seemed hard at the time we realize that they serve a purpose in preparing us for our chosen profession. We each look forward to a fourth and final year of acquiring further insight into the principles that must be applied in order that we may achieve the successful practice of dentistry.

The first day back at the B. C. D. S. was one to be remembered and one that brought back many memories of our Freshman year. Being initiated into the basic aspects of physiology and the microbial world of Dr. Shay made us forget most of last year's routine except for one thing: the fact that our gastrocnemius muscles began to develop again from our climb to the heights of Mt. Olympus.

We recognized all the familiar faces from our previous year, with the exception of three who were missing. Of our instructors, there were two familiar faces among the group—Dr. Oggesen, who kept us at the "grind stone" soldering bridges and looking for crowns and inlays that invariably were lost down the drain or just happened to "fly through the air with the greatest of ease" into oblivion—Dr. Vanden Bosche who reminded us in operative of the acute line angles that were to be made in the buccal surface. In prosthetic demonstrations we waited in vain for the glass-top table that was supposed to be ordered so that we would not miss a single point concerning the set up. Of course, we can't forget the exasperating moment, which continued into hours when we tried to cannulate the carotid artery of man's best friend. Most of us will admit that we increased our knowledge of the dental world by listening to the speeches of fellow students, anticipating the time when we would be "temporary dentists" with a vast amount of knowledge to deliver to our fellow man.

True, our first year at the B. C. D. S. was never to be forgotten and the same can be said of our Sophomore year—a year in which we got a "taste" of the world of dentistry, and one in which we looked forward to leaving our brown lab jackets to don the white coats as members of the junior class.

Dental School—an oasis virtually isolated from the rest of the hustle and bustle of the city around it. One hundred men have met to embark upon an endeavor, both individual and collective, which will determine their future lives. A convergence of different backgrounds and characteristic accents well describes the Freshman Class. Orientation brought many strange and intriguing experiences. On our first day we learned of a new law of physics—"Aisenberg's Gas Law."

With a deluge of boxes and bags containing various non descript equipment came the first "Green Hornet Gang."

We, the Class of 1964, can lay claim to two other firsts—the first beginning class to have use of the new and modern Baltimore Union and the equally new and impressive Health Sciences Library.

In a world of our own, among police dog patrols and ambulance and fire sirens, we attempted to settle down and decipher some of the multitudes of new situations and activities. At times, it seemed as though our feet could have done a better job than our hands in the dental materials laboratory.

Would some one kindly tell us who posted the first Anatomy examination grades on the freshman locker room bulletin board??

The second semester introduced us to the dentition of the narwhale and a completely foreign language of such as "the mesial angle is actually the point of junction of labio-mesial, linguo-mesial line angles, and the incisal surface, with the lingual surface forming a lingual fossa bordered by the mesial, distal, and incisal ridges and traversed by the lingual developmental lines from the cingulum"???!

Despite all circumstances we did manage to acquire a certain amount of knowledge during our first year.

gorgas odontological society

The Gorgas Odontological Society is an honorary scholastic group formed in 1916. It was named in honor of one of the School's graduates and prominent dental educators, Ferdinand J. S. Gorgas.

Membership in the Society may be achieved in either the junior or senior year. Acceptance is based on the premises that certain academic standards have been met in the previous two years and that these standards be maintained following admission into the Society.

Monthly meetings afford educational benefits beyond those of the normal school curriculum. At the spring formal each year, the senior members are presented with a key and certificate.

The Student Senate is composed of its elected officers, the president and two representatives from each class, and the Interfraternity Council president. The primary objectives of the Senate are to serve as a liaison between the student body and the faculty; to promote and maintain harmonious student-faculty relations; to consider any problems of common interest that may confront the student body and to recommend solutions to them. The contributions of the Senate to the welfare of the student body this year have been the establishment of an interest-free loan fund, change of the freshmen lab uniforms to a more acceptable design, Freshmen orientation program, organization of the student handbook, calendar of events, Student Mixer and class dances, sports program, and participation in the Professional Schools Senate.

The Interfraternity Council is an organization concerned with the activities of the dental fraternities. It is responsible for maintaining effective liaison between the fraternities and the Student Senate and enforces all regulations that are enumerated in its constitution.

The greatest responsibility of the Council is the governing of the annual rush weeks. This year, the weeks were held from February 6 to February 19, and the functions were very successful.

The I.F.C. also takes an active part in the sports program of the school. Trophies are awarded to the champions in bowling, basketball, and softball at the Council's sports banquet.

There is also an award given by the I.F.C. to the senior, elected by his class, who has contributed most to student activities during his four years at the school.

sports

As announcement day of 1960 approached and the pitter-patter of little mallets echoed throughout the clinic floor, A.O. swept the softball crown with six successive victories over S.E.D., Psi O, and ZIP. The season's highlight was A.O.'s come-from-behind 7-6 win over defending champion Psi O. This spring A.O. returns six seniors, Morris Antonelli, Lester Breen, Arnie Hecht, Arnie Loew, Larry Wynne, and Richard Sachs, to defend its crown.

The fall semester opened with I.F.C. President, Larry (director of athletics) Clark, heading up the department of physical culture. Except for the athletic feats performed with automatic mallet and "lubba dam" during clinic hours, fall sports were absent from the curriculum at B.C.D.S.

After returning from the Christmas vacation, the B.C.D.S. version of the N.B.A. got under way, with five teams pounding the hardwood floor every Wednesday night. Paced by McLaughlin, Kamezawa, Crouse, Kovack, Zulascki, Maser, Webster, and Krupinsky, ZIP remained undefeated and captured the 1961 crown. Many thanks to Larry Clark for a job well done as the man in the striped shirt.

A.O. sponsored its annual bridge tournament in January, with the team of Lester Breen and Dick Sachs defeating all challengers and emerging as kings of the card sharks.

Bowling, the national pastime of the embryo dentists of B.C.D.S., was thrown open to competition in January. As this column goes to press, defending champion A.O., sorely missing the services of last year's star, Harry B. Levy, has sunk to the doldrums of last place. S.E.D. is leading the league, with ZIP and Psi O close behind. With only half of the season over, none of the teams can be counted out.

ODE TO A FOIL

I think that I shall never see
A foil as lovely as a class III.
A foil with margins that are not shy,
Even the Hose will breathe a sigh.

Surfaces so smooth and with no pits,
The powers that be will all have fits.
Finish so glossy, contour well rounded,
There may be doubt that it was pounded.

But the patient knows, bless his throbbing head,
For many's the time he wished he were dead.
You see, once it fell out, though it now rests true,
Thanks to the foil-plugger's friend, good ol' Elmer's glue.

In '57 our freshman year,
Filled with anxiety and even fear
We matriculated at this institution
And began our dental education.

As juniors we looked forward with anticipation
To our first patient and first preparation.
Patients were scarce, you will remember;
Few men had their share before December.

Our first actual contact with dentistry
Was presented by Doctor Ramsey.
Anatomy was taught by Thompson and Hahn
Across the street in the old barn.

We were proud of a couple of men named Joe.
Of course, we're referring to Biddix and Cappuccio.
To these two men we express our gratitude
For bolstering our egos and helping our attitude.

For biochem we had a man
Known to all as old Doctor Van.
We shall always remember our freshman days
And remember those men for their kind ways.

Some of the more enjoyable time was spent
Talking to Smith and Klein and Yent,
And through the year it was rather nice
To be instructed by men such as Veltre and Preis.

As sophomores we were glad to see
More emphasis placed on dentistry.
In crown and bridge we had some fun
Thanks to the efforts of Doctor Oggesen.

As seniors we set out with requirements in mind
And tried our best not to fall behind.
Foils and bridges and inlays were produced
And slowly but surely our requirements were
reduced.

To Mr. Foley we owe our respect;
He helped to shape our intellect.
For the speeches made and papers recorded
We, in future years, shall be rewarded.

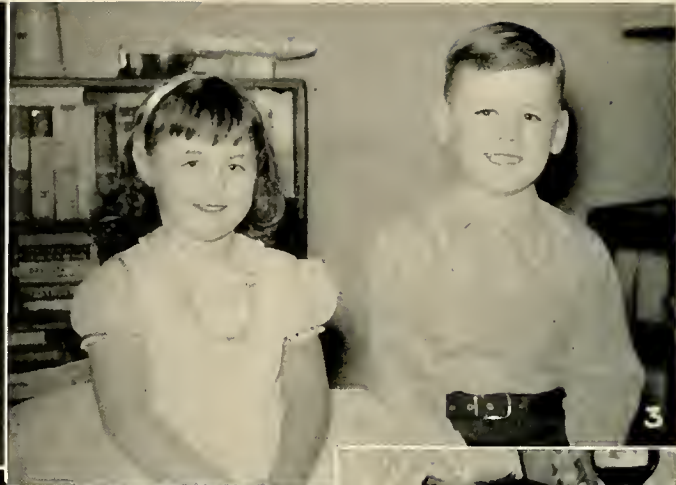

Working in prosthetics was a delight
Because of the helpfulness of Ramsey and Wright.
For fairness no one surpassed Jose Medina;
The godsend in pedo was Joe Giardina.

No doubt sophomore year was tough.
The labs were long and exams were rough.
But its merits were not realized until
We entered the clinic and discovered our skill.

We seniors hope that every class has
Men humble as Dosh and Diaz.
The feeling is prevalent throughout our ranks
That all these men deserve our sincerest thanks.

2 Outstanding Contributions to Dental Education and Practice

COLUMBIA DENTOFORMS

FROM a humble start 40 years ago Columbia Dentoforms have played an increasingly important role in dental education. Today every dental student in the United States and Canada "cuts" his first teeth on Dentoforms, for we supply Dentoforms to every dental college in the U. S. and Canada and to many in other lands.

In these 40 years there have been many improvements and additions to Dentoforms to meet the ever more exacting demands of teachers. Today, Dentoforms number more than a thousand and present conditions the student will encounter in practice. And in graduate years, Dentoforms continue to help clinicians in postgraduate education and to help the busy practitioner in his endless task of patient-education by showing the better dentistry he seeks to give.

BROWN ATTACHMENTS

BROWN Precision Attachments have been used successfully since 1920, when patents were granted to their inventor, Dr. I. Brown. This event followed by only a few years the impetus that Dr. Herman Chayes gave to the advance in removable restorations by the introduction of the precision attachment.

So simple, yet so effective and practical are the design and mechanical principles employed in Brown Attachments, that they have defied every effort to improve upon them for 40 years. Except for the addition of the proximal contact, to give the convenience of a built-in proximal contact, no change in design has been made. The sizes of the Brown Attachments made today are identical with those made 40 years ago—a comforting thought, if replacement parts are required.
